# Joule Scissor Lift

The Joule scissor lift is a hydraulically powered scissor lift capable of lifting loads up to 2000kg. The lift needs to be used in conjunction with a hydraulic power pack and the size of the power pack will have an impact on the lifting speed. Due to the self-weight of the lift consideration needs to be given to the environment that the lift will be used in. Up to 4 individual lifts can be synchronised together to lift one larger top pallet.

<b>Lift Model</b>	Joule
<b>Physical</b>	
Width	1110mm
Depth	2520mm
Self-Weight	1260kg
Platform Size	2520 x 1110mm
Closed Height	700mm
Open Height	4100mm
Rated Payload	2000kg
Max Speed	from 15 sec
<b>Hydraulic Input</b>	
Pressure	140 Bar
<b>Electrical Input</b>	
Control Voltage	+/-10V DC
Recommended Drive	Pascal4
<b>Encoder Input</b>	
Primary	Baluff SSI
