

STAGE ONE

Fabricator Apprenticeship

You may not have heard of Stage One, but we can guarantee you will have seen our work.

You may not have heard of Stage One, but you will have seen our work. We deliver exciting and innovative projects within the creative industries, from Olympic Cauldrons to TV sets, from giant artworks to jaw-dropping structures. End clients include Google, The BBC, The Brits, Amazon, Netflix, and Ed Sheeran.

We are a creative construction and manufacturing company and are responsible for delivering some of the most iconic projects in recent times.

We are a multi-disciplined manufacturing facility spread over 14,000Sqm of estate with four manufacturing and storage facilities, engineering, fabrication, woodwork, finishing and a specialist manufacturing facility.

The Apprentice Fabricator will experience one-of-a-kind projects that will accelerate their development.

Not only will apprentices complete their qualifications and coursework at college, but they will also be starting on a fantastic career path with an exciting and dynamic company.

DETAILS OF THE ROLE

SALARY	£7.99 per hour
HOURS OF WORK	Monday – Friday, 07:30 – 16:00, including college attendance when required.
LOCATION	Based at Tockwith, near York, with potential site work

ABOUT THE ROLE

This exciting opportunity will provide a fantastic welding experience working on a variety of bespoke projects.

Working within our metal fabrication department carrying out welding and fabrication tasks on a range of projects, duties will include:

- Welding and fabrication of steel
- Drilling and grinding of steel
- Daily manual handling
- Operating welding and plant equipment
- Safe use of metal fabrication power tools

ABOUT THE ROLE

Apprentices will study at York College (this may be day release or block release each week, depending on the course) and then be based at our office and workshops in Tockwith on the outskirts of York. Please note the location (YO26 7QF) as public transport is limited.

Upon successful completion of the apprenticeship, the qualifications that will be achieved are:

- Metal Fabricator Apprenticeship Level 3
- Diploma in Advanced Manufacturing Engineering Level 3

APPRENTICESHIP FEEDBACK

Comments from previous Stage One apprentices include:

“The variation that the company offers in its work is key. The opportunity to travel with the job is also a great advantage as it helps to expand your knowledge of the wider construction world. The structure of the apprenticeship allows you to progress rapidly, leaving all avenues open.”

“The main reasons I enjoy working for Stage One is the diverse work and the opportunity to work on prestigious projects.”

“I’ve become a member of a great team. I’ve been lucky enough to travel to some amazing places and see some amazing things, from Germany to Abu Dhabi, a place I never thought I’d get to see. The college course allowed me to learn while in a great environment and enjoyed the course immensely. My highlight has to be the members of staff, there is always a great feeling of being with good friends and it really helps. My years here have been the best time I could ask for.”

“Starting an apprenticeship with Stage One has been one of the best things I could have done. The support offered by my colleagues has been incredible, from always having time for me when I have a query, to even helping me with revision for my exams. My qualifications side of the apprenticeship has been done through York College which has always run very smoothly. I would recommend an apprenticeship scheme for anyone trying to kick start a career and Stage One is a brilliant company to do that with.”
